

The Doctoral Internship Program

at Rogers Memorial Hospital

Aims of the Program:

The doctoral internship program at Rogers Memorial Hospital provides a broad range of experiences working with diverse child, adolescent and adult populations. The program allows interns to apply their scholarly knowledge as they expand and refine their practice skills through clinical experiences including: completion of diagnostic interviews and assessments as well as participation in interdisciplinary treatment meetings; creation and monitoring of measurable treatment goals; development of interventions appropriate for a diagnosis; planning and implementation of psycho educational and psychotherapy groups; development of proficiency in the modalities of individual, family and group therapy and supervision of pre-Master's level therapy students. The goal of these experiences is for interns to develop the skills and confidence needed to begin their career as a practicing health service psychologist. Interns will be challenged and will be offered the support and supervision needed to be effective in their roles.

The doctoral internship program functions as one of the professional training programs within Rogers Memorial Hospital. Interns will have exposure to many of the specialized behavioral healthcare services provided by Rogers Memorial Hospital. They will benefit from their contact with professional staff across a broad spectrum of settings and clinical programs. Throughout the process, the Director of Clinical Training and Chief Psychologist will be actively involved to direct and monitor the intern's experience.

Specifically, the goals for training will include producing entry level health service psychologists:

1. With competence in applying theories and methods of effective, evidence-based psychotherapeutic intervention.
2. Who possess substantial competency in psychological assessment.
3. Who understand and appreciate the importance of maintaining and applying current knowledge of research and scholarly inquiry in the profession of health service psychology.
4. Who demonstrate competence in communication and interpersonal skills, who are adept at consultation and who function successfully as part of an interdisciplinary team.
5. With competence in professional values, professional conduct, professional ethics, and an understanding of relevant mental health law through continued professional development and appropriate use of supervision.
6. With competence in individual and cultural diversity as they relate to practice in a diverse society.
7. With competence in applying the current literature in providing supervision to practicum students.

About the Rogers Behavioral Health System:

Rogers Memorial Hospital is a part of the Rogers Behavioral Health System, Inc., which was established in 2008 by the hospital's board of directors. This not-for-profit system consists of the following entities:

- The hospital with its multiple locations;
- Rogers Memorial Hospital Foundation; and
- Rogers InHealth

About Rogers Memorial Hospital:

Rogers Memorial Hospital is Wisconsin's largest, and 2nd largest in the United States, private, not-for-profit, behavioral health care provider for children, teens and adults. The hospital is nationally recognized for its residential treatment centers, including the Eating Disorder Center, the Obsessive-Compulsive Disorder Center, the Herrington Recovery Center, The Focus Adult Program, The Focus Adolescent Program, The Nashotah Lakes DBT Program, Child and Adolescent Centers, and the Adolescent Recovery Program. The hospital also provides inpatient and partial hospitalization, as well as day treatment and intensive outpatient services at six Wisconsin locations and facilities in Illinois, Florida, Minnesota, Tennessee, and Pennsylvania.

Training Locations:

Oconomowoc:

Rogers' Oconomowoc campus is located on 50 acres of wooded, lakefront property and is home to our nationally respected residential centers. Inpatient and partial hospitalization care is also available at our Oconomowoc campus.

The city of Oconomowoc is located in southeastern Wisconsin, about 30 miles west of metropolitan Milwaukee. Our campus is less than an hour from Madison and approximately two hours from Chicago. Additional information about the Oconomowoc area can be found at: <http://www.oconomowoc-wi.gov>

Milwaukee:

Rogers' West Allis campus, located in Milwaukee, provides inpatient, partial hospitalization and day treatment services for children, adolescents, adults and older adults.

The city of Milwaukee is located in southeastern Wisconsin. It is approximately 1.5 hours from Madison and approximately 1.5 hours from Chicago. Further details regarding the metropolitan Milwaukee area can be found at: <http://www.milwaukee.org>

Hospital Licensing and Accreditation:

Rogers Memorial Hospital is licensed as a psychiatric hospital by the State of Wisconsin and is accredited by The Joint Commission. The Pre-doctoral Psychology Internship Program is accredited by the American Psychological Association (APA) with the next accreditation review in 2021.

Hospital Mission Statement:

We exist to offer exemplary behavioral health care services, including treatment, research, education, training and consultation built on our century-long heritage.

We are dedicated to the delivery of quality care using a skilled team approach that respects the dignity of each individual.

Our success is demonstrated in premier quality care, successful outcome, financial integrity, personal and organizational growth, and community well-being.

Equal Employment Opportunity / Affirmative Action:

It is the policy of Rogers Memorial Hospital to provide equal employment opportunity to all individuals regardless of their race, creed, color, religion, sex, age, national origin, handicap, veteran status, or any other characteristic protected by state or federal law.

Plan Location and Sequence of Training Experiences:

The internship consists of two major tracks separately located in the Oconomowoc or West Allis (located in Milwaukee) locations of Rogers Memorial Hospital. Two interns are assigned to the OCD and Anxiety Disorders Track in Oconomowoc, and two interns are assigned to the Child and Adolescent Day Treatment (CADT)/Partial Hospitalization Program (PHP) track in West Allis. All internship tracks are five days a week. Separate applications are required for the OCD/Anxiety and the Child and Adolescent Day Treatment track.

Training Site Descriptions:

The OCD and Anxiety Disorders Internship Track

The Obsessive-Compulsive Disorder Center

The Obsessive-Compulsive Disorder Center is one of only two residential treatment centers in the United States specializing in the treatment of males and females age 18 and older with severe obsessive-compulsive disorder (OCD), obsessive-compulsive (OC) spectrum disorders such as trichotillomania and body dysmorphic disorder and other anxiety disorders (i.e., generalized anxiety disorder, panic disorder, agoraphobia, social anxiety disorder, and post-traumatic stress disorder). Located on a 22-acre site about a half-mile east of the hospital's Oconomowoc campus, the center can accommodate up to 28 patients and features expansive treatment and living areas.

Prior to admission, an initial telephone screening is conducted by admissions staff and then reviewed by the clinical director and key clinical staff. Based on this review, a recommendation is made for the appropriate level of care. On admission, a comprehensive evaluation, which includes a battery of assessments to ascertain the patient's medical, emotional, educational, developmental and social history, is conducted. This detailed assessment also includes administration of Yale-Brown Obsessive-Compulsive Scale (Y-BOCS), generation of exposure exercises, and creation of a graduated exposure hierarchy.

Upon admission, each patient is assigned to a core clinical team consisting of a psychiatrist, behavioral specialist, nurse, therapist, and residential counselor. Members of the core clinical team conduct a detailed assessment, develop the treatment goals and exposure hierarchy, then facilitate and monitor the patient's progress. Treatment goals are accomplished through a program consisting of individual work sessions and group psychotherapy. The center's staff uses a strict cognitive-behavioral approach and a graduated exposure hierarchy for each individual. For OCD, the main emphasis is Exposure and Ritual Prevention (ERP). In addition to ERP, cognitive restructuring strategies are also taught.

Approximately 30 hours of cognitive-behavioral therapy treatment is provided each week. The length of stay at the Obsessive-Compulsive Disorder Center is open-ended; the average length is 60 days. Our overall goal is for patients to complete at least 70% of their hierarchy during their treatment stay before recommendation for step down to a lower level of care is determined. See Sample Schedule.

Time	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
7:30-8:45a	--Vital Signs Taken; Medications Dispensed, Breakfast --						
9:00-9:30a	--Homework Review Group --						AA mtg at Main 8:45 Spirituality at Crosspoint

Rotations:

Fourth quarter part-time rotation opportunities include: Child Center Residential Program, Adolescent Center of OCD and Anxiety, Eating Disorder Center, Focus Adolescent and Adult Residential Programs.

Child & Adolescent Intensive Outpatient Program (IOP) and Partial Hospitalization Program (PHP) Internship Track

The day treatment and PHP staff offer a comprehensive treatment approach that helps children understand and manage their behaviors. Our experienced team works closely with the family, school and primary care providers to coordinate a treatment plan the meets each child’s needs and maximizes their outcomes.

The program provides coordinated treatment services in a safe and structured setting five days per week, for CADT in either morning (8:00 a.m. – 11:00 a.m.) or afternoon (1:00 p.m. – 4:00 p.m.) sessions for children and adolescents ages 10 to 18 at the Milwaukee campus. The PHP program also meets five days a week (8:00am to 2:00pm) and services children and adolescents at the Milwaukee campus. All patients receive individual, group, family and experiential therapy and psychiatric consultation. In addition to age-specific general mental health groups, specialized groups are offered for children and teens who present with externalizing behaviors or internalizing behaviors. All groups incorporate a trauma informed care model. See Sample Schedules below:

An example of a typical week schedule on the Child & Adolescent Day Treatment Program is shown:

As professionals in the Child & Adolescent IOP, interns will utilize Dialectical Behavioral Therapy (DBT), Cognitive Behavioral Therapy (CBT) and solution-focused treatment techniques in addition to a more broad range of theoretical approaches. Interns will complete diagnostic evaluations, have the opportunity to work with both short and long-term clinical cases and will see patients in individual, group, and family therapy. They will gain skills in managing client crises, behavioral de-escalation, and risk assessment. Interns will have the opportunity to gain specific knowledge in working with an organized trauma-informed care program, and in working with treatment groups specific to both internalizing and externalizing behaviors. They will work with clients who come from various ethnic, cultural, and socio-economic backgrounds.

Both programs incorporate trauma-informed care programming in all of the groups. Children and adolescents who attend CADT and PHP are likely to have experienced a trauma, which could include: physical or sexual abuse, the loss of a parent, sibling or significant relative due to death or incarceration, multiple transitions in the foster care system, or witnessing or experiencing of a violent crime.

Trauma-informed care assesses the effects of trauma on a child behavior. The treatment teams work to better understand the function of the patient's behavior and the ways it is influenced by previous trauma. The patients learn to use coping strategies to decrease symptoms, to safely express their feelings about the trauma, to come to see their own reactions as normative, to reduce their feelings of shame, to put the traumatic experience into a larger context, and to obtain a sense of mastery regarding the painful events they have experienced. Professionals who are highly trained and experienced in working with traumatized children lead all CADT groups.

A wide variety of techniques are employed based on the child and family's individualized needs, but the tools used are those demonstrated to have value in treating trauma-related symptomatology. In the adolescent groups, the teens benefit greatly by the group dynamic in terms of not feeling alone in their experiences. The adolescents also learn many of the skills taught in Dialectical Behavior Therapy to help stabilize their moods and focus on the present. Further, there is a strong family component where psycho-education, emotional support, and validation are given to parents. Parents are taught to provide the same skills to their children.

- **Externalizing Behavior Specialized Treatment Group:**

The group treatment philosophy revolves around a cognitive-behavioral treatment model and the ARC model (Attachment, Self-Regulation, and Competency). Problems that are addressed in the externalizing behavior groups include: poor anger management, low frustration tolerance, impulsivity and distractibility, persistent explosive outbursts, defiant behavior toward authority figures, aggression toward peers and adults, poor social skills, school refusal, declining school performance, excessive worry or anxiety, trauma, and depression. The group room uses a token economy system – a system in which children receive direct rewards (“poms”) for compliance with group room rules, staff directions, and engagement in therapeutic activities. “Poms” earned can be used to purchase privileges in the group room, such as games, school supplies, therapeutic materials, special lunches, or other rewards created by therapists. “Poms” can be lost if a child engages in verbal or physical aggression.

The group treatment helps children learn problem-solving, build competency, and build emotional regulation– the skills that are shown in research to be helpful in preventing aggressive and defiant behavior in children. The group also emphasizes social skills development and improvement. Pro-social skills are modeled, practiced, and reinforced in the group. Feedback is provided by staff when children are observed using inappropriate social skills. This real-time feedback is essential for the child to internalize what they learn to create long-lasting changes. Medication consultation also takes place with a board certified child/adolescent psychiatrist.

- **Internalizing Behavior Specialized Treatment Group:**

The overall focus of this specialty group is on challenging thought processes and behaviors that contribute to maintaining anxiety and depression as well as on learning positive coping skills. The adolescents enrolled in this program receive group, individual, and family therapy. There is a strong psycho-educational component regarding diagnoses for both the teens and their families. Medication consultation also takes place with a board certified child/adolescent psychiatrist. The school liaison works with the school professionals to provide additional information of the adolescent’s diagnosis and how it may affect school performance.

The Internalizing Teen Group specifically addresses the core characteristics of depression and anxiety. Some patients in this group show school avoidance and staff works with the patient’s school to facilitate a successful return to a the academic setting. There is a heavy focus on Dialectical Behavioral Therapy (DBT) with the patients and their families. Skills for emotional regulation, distress tolerance, and problem-solving are addressed daily, in order to deter patients from expressing their anger, depression, anxiety, and frustration in a maladaptive way. Staff closely monitor and assess patients’ safety risk on a daily basis. Many internalizing patients engage in self-harm through cutting or burning, or may develop suicidal thoughts or even attempt suicide. This group provides patients the opportunity to express their feelings in a healthy and safe manner.

- **Pre-Adolescent Partial Hospitalization/Intensive Outpatient Program (PHP/IOP):**

Interns have an option to work in a combined six hour (8:00am to 2:00pm)/three hour (8:00am to 11:00am) pre-adolescent partial hospital IOP program. These programs serve pre-adolescents ages 10 to 13 years old who are struggling with depression. Anxiety, ADHD, trauma, and DMDD and are high risk for impulsivity and unsafe behaviors. These programs serve as a supportive and structured step down from inpatient level of care after stabilization when patients need more assistance with these struggles. Patients generally start in partial hospitalization program and step-down to the intensive outpatient program. This group uses the ARC model (Attachment, Self-Regulation, and Competency) as the basis for the programming. Interns and staff provide individual, group, and family therapy in addition to milieu management. Medication consultation also takes place with a board certified child/adolescent psychiatrist.

- **Adolescent Partial Hospitalization Programs:**

Interns have an option to work in a six hour (8:00am to 2:00pm) adolescent partial program. These programs serve adolescents ages 12 to 18 years old who are struggling with depression, anxiety, trauma and are high risk for suicide and self-harm behaviors. This program serves as a supportive and structured step down from inpatient level of care after stabilization and a step up from CADT when patients need more assistance with these internalizing struggles. There is a heavy focus on Dialectical Behavioral Therapy (DBT) with the patients and their families. Interns and staff provide individual, group, and family therapy in addition to milieu management. Medication consultation also takes place with a board certified child/adolescent psychiatrist.

The Training Curriculum:

Rogers Memorial Hospital's internship program follows the practitioner-scholar model, which emphasizes applying scientific knowledge and scholarly inquiry to the clinical practice of psychology grounded in the belief that clinical practice must continually evolve through integrating the most current and evidenced based research practices. Interns are provided opportunities to expand their knowledge base through didactic seminars, grand rounds presentations, individual and group supervision, selected readings, and interactions with other professionals within the hospital system. In addition, interns are exposed to numerous empirically-based treatments and are taught to be excellent consumers of research to enhance their work with patients. In line with this, interns are expected to collect data, often in the form of self-report measures, throughout their patients' treatment in order to examine patients' progress and alter the treatment approach as necessary.

Our training model is both developmental and competency based, with opportunities to develop and refine fundamental skills in assessment, clinical interviewing, intervention, supervision/consultation, and administration. Interns move from close supervision, mentorship, and intensive instruction to relatively autonomous functioning over the course of the year. Interns take an active and responsible role in developing their training plan and in adjusting it to meet their needs and emerging interests. The program's training model is flexible, in that it attends to each intern's individual training needs based on prior experience, skill acquisition, and comfort level. Supervisors continually assess the interns' training needs and provide the level of supervision and clinical experiences necessary to allow each intern to develop autonomy. Additionally, interns are expected to develop specific competencies and are assessed in relation to their progress with these competencies throughout the year via both their quarterly evaluations and weekly supervision sessions. Then, through this model, graduating interns develop the competencies and sense of professional identity needed for entry-level positions in psychology.

Profession-wide Competency Goals and Objectives & Internship competencies

The internship seeks to develop competencies in six areas of professional practice. The goals and objectives of the training program are outlined below.

Research/Scholarly Inquiry

Goal 1: To produce graduates who demonstrate independent ability to critically evaluate research and engage in scholarly activities related to health service psychology

Objective(s) for Goal 1: Demonstrate the substantially independent ability to critically evaluate and disseminate research or other scholarly activities at the local, regional or national level.

Competencies:

1. Independently applies scientific methods to practice
 - a. Apply evidence-based practice in clinical work
2. Demonstrates advanced level knowledge of core science (i.e., scientific bases of behavior)
 - a. Identify and critically review current scientific research and extract findings applicable to

- practice
- 3. Independently applies knowledge and understanding of scientific foundations to practice
 - a. Apply evidence-based practice in clinical work
- 4. Generates knowledge (i.e. Program development, program evaluation, didactic development, dissemination of research)
 - a. Identify and critically review current scientific research and extract findings applicable to practice
 - b. Apply evidence-based practice in clinical work
- 5. Applies scientific methods of evaluating practices, interventions, and programs
 - a. Apply evidence-based practice in clinical work
- 6. Demonstrates knowledge about issues central to the field; integrates science and practice typical of the practitioner scholar model
 - a. Identify and critically review current scientific research and extract findings applicable to practice

Ethical and Legal Standards

Goal 2: To produce graduates with competence in professional conduct, professional ethics, and an understanding of relevant mental health law through continued professional development and appropriate use of supervision.

Objective(s) for Goal 2: Understand and apply ethical and legal principles to the practice of Health Service Psychology. Develop appropriate professionalism in supervision and with other professionals and staff.

Competencies:

1. Understands the ethical, legal, and contextual issues of the supervisor role
 - a. Document clinical contacts timely, accurately, and thoroughly
 - b. Identify and respond appropriately to ethical issues as they arise in clinical practice
 - c. Interact with colleagues and supervisors in a professional and appropriate manner
2. Demonstrates advanced knowledge and application of the APA Ethical Principles and Code of Conduct and other relevant ethical, legal and professional standards and guidelines
 - a. Identify and respond appropriately to ethical issues as they arise in clinical practice
 - b. Document clinical contacts timely, accurately, and thoroughly
3. Independently utilizes an ethical decision-making model in professional work
 - a. Identify and respond appropriately to ethical issues as they arise in clinical practice
 - b. Document clinical contacts timely, accurately, and thoroughly
 - c. Conducts self in an ethical manner in all professional activities
4. Independently integrates ethical and legal standards related to relevant laws, regulations, rules and policies governing health service psychology at the organizational, local, state, regional and federal levels with all competencies
 - a. Identify and respond appropriately to ethical issues as they arise in clinical practice
 - b. Interact with colleagues and supervisors in a professional and appropriate manner
 - c. Document clinical contacts timely, accurately, and thoroughly

Individual and Cultural Diversity

Goal 3: To produce graduates with competence in individual and cultural diversity as it relates to practice in a diverse society.

Objectives(s) for Goal 3: Demonstrate the ability to independently apply their knowledge and approach in working effectively with a range of diverse individuals and groups encountered during internship.

Competencies:

1. Independently monitors and applies an understanding of how their own personal/cultural history, attitudes, and biases may affect assessment, treatment, and consultation
 - a. Understand and explore the impact of the one's own cultural background and biases and their potential impact on the process of treatment
 - b. Effectively engage in self-evaluation in order to utilize personal strengths in the therapeutic process
 - c. Understand how their own personal/cultural history attitudes and biases may affect how they understand and interact with people who are different from themselves

2. Independently monitors and applies current theoretical and empirical knowledge of diversity in others as cultural beings in assessment, treatment, supervision, research, training and consultation
 - a. Understand and explore the impact of the client's cultural background and biases and their potential impact on the process of treatment
 - b. Establish rapport and therapeutic alliances with individuals from diverse backgrounds
 - c. Applies current theoretical and empirical knowledge in assessment, supervision, research, training and consultation
3. Applies, knowledge, skills, and attitudes regarding dimensions of diversity to professional work
 - a. Understand and explore the impact of the one's own cultural background and biases and their potential impact on the process of treatment
 - b. Understand and explore the impact of the client's cultural background and biases and their potential impact on the process of treatment
 - c. Establish rapport and therapeutic alliances with individuals from diverse backgrounds
 - d. Applies a framework for working effectively with areas of individual and cultural diversity not previously encountered over the course of prior training
 - e. Able to work effectively with individuals whose group membership, demographic characteristics or worldviews create conflict with their own
4. Independently monitors and applies knowledge of self as a cultural being in assessment, treatment, and consultation
 - a. Provide accurate culturally and clinically relevant feedback regarding testing, assessment, and behavior modification plans to non-psychology staff
 - b. Interact professionally as a member of a multidisciplinary team
 - c. Provide culturally sensitive psychological input to improve patient care and treatment outcomes

Professional Values and Attitudes

Goal 4: To produce graduates with the ability to respond professionally in increasingly complex situations with a greater degree of independence.

Objective(s) for Goal 4: Demonstrate values consistent with the professional practice of psychology.
Competencies:

1. Behave in ways that reflect the values and attitudes of psychology including integrity, deportment, professional identify, accountability, lifelong learning and concern for the welfare of others.
2. Actively seek and demonstrate openness and responsiveness to feedback in supervision.
3. Respond professionally in increasingly complex situations with a significant degree of independence.
4. Accurately self-assesses competence in all competency domains; integrates self-assessment in practice; recognizes limits of knowledge/skills and acts to address them; has extended plan to enhance knowledge/skills
 - a. Interact with colleagues and supervisors in a professional and appropriate manner
 - b. Engage in self-care and appropriate coping skills in regard to stressors
 - c. Effectively engage in self-evaluation in order to utilize personal strengths in the therapeutic process
 - d. Shows awareness of need for and develops plan for ongoing learning to enhance skills
5. Self-monitors issues related to self-care and promptly intervenes when disruptions occur
 - a. Interact with colleagues and supervisors in a professional and appropriate manner
 - b. Engage in self-care and appropriate coping skills in regard to stressors
 - c. Effectively engage in self-evaluation in order to utilize personal strengths in the therapeutic process
6. Demonstrates reflectivity in context of personal and professional functioning (reflection-in-action); acts upon reflection; uses self as a therapeutic tool.
 - a. Engages in self-reflection regarding one's personal and professional functioning; engage in activities to maintain and improve performance, wellbeing, and professional effectiveness.
 - b. Effectively engage in self-evaluation in order to utilize personal strengths in the therapeutic process
 - c. Evaluate intervention effectiveness and adapt intervention goals and methods consistent with ongoing evaluation.
7. Conducts self in a professional manner across settings and situations
 - a. Interact professionally as a member of a multidisciplinary team

- b. Provide informative and appropriate professional presentations

Communication and Interpersonal Skills

Goal 5: To produce graduates that are able to respond professionally in increasingly complex situations with a significant degree of independence.

Objective(s) for Goal 5: Demonstrate professional competence in interpersonal skills across activities and interactions.

Competencies:

1. Develop and maintain effective relationships with a wide range of individuals including colleagues, communities, organizations, supervisors, supervisees and those receiving professional services.
2. Produce and comprehend oral, nonverbal, and written communications that are informative and well integrated; demonstrate a thorough grasp of professional language and concepts.
3. Demonstrates effective interpersonal skills, manages difficult communication, and possesses advanced interpersonal skills
 - a. Interact with colleagues and supervisors in a professional and appropriate manner
 - b. Engage in self-care and appropriate coping skills in regard to stressors
4. Verbal, nonverbal, and written communications are informative, articulate, succinct, sophisticated, and well-integrated; demonstrates thorough grasp of professional language and concepts
 - a. Communicates results in written and verbal form clearly, constructively, and accurately in a conceptually appropriate manner.
 - b. Interact with colleagues and supervisors in a professional and appropriate manner
 - c. Document clinical contacts timely, accurately, and thoroughly
5. Applies knowledge to provide effective assessment feedback and to articulate appropriate recommendations
 - a. Identify and respond appropriately to ethical issues as they arise in clinical practice
 - b. Interact with colleagues and supervisors in a professional and appropriate manner
 - c. Document clinical contacts in a timely manner, accurately, and thoroughly

Assessment

Goal 6: To demonstrate skill in the selection, administration, scoring, interpretation, and integrated report-writing of assessment/testing batteries within the scope of Health Service Psychology.

Objective(s) for Goal 6: To demonstrate skill in the selection, administration, scoring, interpretation, and integrated report-writing of assessment/testing batteries within the scope of Health Service Psychology.

Competencies:

1. Independently selects and implements multiple methods and means of evaluation in ways that are appropriate to the identified goals and questions of the assessment as well as diversity characteristics of the service recipient.
 - a. From a variety of testing materials, select those most appropriate for the referral question
 - b. Collect data from a variety of sources (interview, medical record, prior testing reports, collateral information)
2. Independently understands the strengths and limitations of diagnostic approaches and interpretation of results from multiple measures for diagnosis and treatment planning
 - a. From a variety of testing materials, select those most appropriate for the referral question
 - b. Collect data from a variety of sources (interview, medical record, prior testing reports, collateral information)
3. Independently selects and administers a variety of assessment tools that draw from the best available empirical literature and that reflect the science of measurement and psychometrics and integrates results to accurately evaluate presenting question appropriate to the practice site and broad area of practice
 - a. From a variety of testing materials, select those most appropriate for the referral question
 - b. Administer, score, and interpret testing results correctly
4. Utilizes case formulation and diagnosis for intervention planning in the context of stages of human development and diversity
 - a. Collect data from a variety of sources (interview, medical record, prior testing reports, collateral information)
 - b. Incorporate data into a well-written, integrated report

- c. Demonstrate a working knowledge of DSM-5 nosology and multi-axial classification
- 5. Independently and accurately conceptualizes the multiple dimensions of the case based on the results of assessment
 - a. Collect data from a variety of sources (interview, medical record, prior testing reports, collateral information)
 - b. Incorporate data into a well-written, integrated report
- 6. Communicates results in written and verbal form clearly, constructively, and accurately in a conceptually appropriate manner
 - a. Incorporate data into a well-written, integrated report
 - b. Demonstrate a working knowledge of DSM-5 nosology and multi-axial classification
- 7. Demonstrates knowledge of and ability to select appropriate and contextually sensitive means of assessment/data gathering that answers consultation referral question
 - a. Provide accurate and clinically relevant feedback regarding testing, assessment, and behavior modification plans to non-psychology staff
 - b. Provide psychological input to improve patient care and treatment outcomes
- 8. Applies knowledge to provide effective assessment feedback and to articulate appropriate recommendations
 - a. Provide accurate and clinically relevant feedback regarding testing, assessment, and behavior modification plans to non-psychology staff that is sensitive to a range of audiences
 - b. Interact professionally as a member of a multidisciplinary team
 - c. Apply evidence-based practice in clinical work
- 9. Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective.
 - a. Provide accurate and clinically relevant interpretation regarding testing, assessment, and behavior modification plans to non-psychology staff
 - b. Apply evidence-based practice in clinical work

Intervention

Goal 7: To produce graduates with competence in theories and methods of effective, empirically-supported psychotherapeutic intervention.

Objective(s) for Goal 7: To demonstrate skill in case conceptualization, treatment goal development, and evidence-based therapeutic interventions consistent with the scope of Health Service Psychology.

Competencies:

- 1. Independently applies knowledge of evidence-based practice, including empirical bases of assessment, clinical decision making, intervention plans, and other psychological applications, clinical expertise, and client preferences
 - a. Utilize theory and research to develop case conceptualizations
 - b. Identify and utilize appropriate evidence-based group and individual interventions
- 2. Independently plans interventions; case conceptualizations and intervention plans are specific to case and context
 - a. Develop treatment goals that correspond to the case conceptualization
 - b. Identify and utilize appropriate evidence-based group and individual interventions
 - c. Effectively manage behavioral emergencies and crises
 - d. Evaluate intervention effectiveness and adapt intervention goals and methods consistent with ongoing evaluation
- 3. Displays clinical skills with a wide variety of clients, establish and maintain effective relationships with the recipients of psychological services, and uses good judgment even in unexpected or difficult situations
 - a. Identify and utilize appropriate evidence-based group and individual interventions
 - b. Effectively manage behavioral emergencies and crises
 - c. Establish and maintain effective relationships with the recipients of psychological services.
 - d. Implement interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables.
 - e. Modify and adapt evidence-based approaches effectively when a clear evidence base is lacking.

Supervision

Goal 8: To produce graduates who are knowledgeable in supervision models and practices and act as role models for the individuals they supervise within the scope of Health Service Psychology.

Objective(s) for goal 8: Demonstrate the ability to apply supervision models and practices with trainees.

Competencies:

1. Apply knowledge of supervision models and practices in direct practice with psychology trainees or other mental health professionals.
2. Demonstrates knowledge of supervision models and practices; demonstrates knowledge of and effectively addresses limits of competency to supervise
 - a. Identify and respond appropriately to ethical issues as they arise in clinical practice
 - b. Interact with colleagues and supervisors in a professional and appropriate manner
 - c. Engage in self-care and appropriate coping skills in regard to stressors
3. Engages in professional reflection about one's clinical relationships with supervisees, as well as supervisees' relationships with their clients
 - a. Identify and respond appropriately to ethical issues as they arise in clinical practice
 - b. Interact with colleagues and supervisors in a professional and appropriate manner
 - c. Engage in self-care and appropriate coping skills in regard to stressors
4. Provides effective supervised supervision, including direct or simulated practice, to less advanced students, peers, or other service providers in typical cases appropriate to the service setting
 - a. Interact with colleagues and supervisors in a professional and appropriate manner
 - b. Document clinical contacts timely, accurately, and thoroughly
5. Independently seeks supervision when needed
 - a. Engage in self-care and appropriate coping skills in regard to stressors
 - b. Identify and respond appropriately to ethical issues as they arise in clinical practice

Consultation and Interprofessional/Interdisciplinary Skills

Goal 9: To produce graduates who are adept at consultation and who function successfully as part of a multidisciplinary team.

Objective(s) for Goal 9: Apply knowledge in direct or simulated consultation with individuals and their families, other healthcare professionals, interprofessional groups, or systems related to health and behavior.

Competencies:

1. Determines situations that require different role functions and shifts roles accordingly to meet referral needs
 - a. Interact professionally as a member of a multidisciplinary team
 - b. Provide psychological input to improve patient care and treatment outcomes
2. Applies teaching methods in multiple settings
 - a. Interact professionally as a member of a multidisciplinary team
 - b. Provide informative and appropriate professional presentations
 - c. Engages in role-played consultation, peer consultation or provision of consultation to other trainees
3. Applies literature to provide effective consultative services (assessment and intervention) in most routine and some complex cases
 - a. Provide accurate and clinically relevant feedback regarding testing, assessment, and behavior modification plans to non-psychology staff
 - b. Provide psychological input to improve patient care and treatment outcomes
 - c. Apply evidence-based practice in clinical work
4. Demonstrates knowledge of didactic learning strategies and how to accommodate developmental and individual differences across multiple settings.
 - a. Interact professionally as a member of a multidisciplinary team
 - b. Provide informative and appropriate professional presentations
 - c. Apply evidence-based practice in clinical work

5. Demonstrates awareness of multiple and differing worldviews, roles, professional standards, and contributions across contexts and systems; demonstrates intermediate level knowledge and respect of common and distinctive roles and perspectives of other professionals
 - a. Interact professionally as a member of a multidisciplinary team
 - b. Effectively engage in self-evaluation in order to utilize personal strengths in the therapeutic process
6. Demonstrates beginning, basic knowledge of and ability to display the skills that support effective interdisciplinary team functioning
 - a. Provide accurate and clinically relevant feedback regarding testing, assessment, and behavior modification plans to non-psychology staff
 - b. Interact professionally as a member of a multidisciplinary team
 - c. Effectively engage in self-evaluation in order to utilize personal strengths in the therapeutic process
7. Participates in and initiates interdisciplinary collaboration/consultation directed toward shared goals
 - a. Provide accurate and clinically relevant feedback regarding testing, assessment, and behavior modification plans to non-psychology staff
 - b. Provide psychological input to improve patient care and treatment outcomes
8. Develops and maintains collaborative relationships over time despite differences
 - a. Interact professionally as a member of a multidisciplinary team
 - b. Effectively engage in self-evaluation in order to utilize personal strengths in the therapeutic process
9. Develops and maintains effective and collaborative relationships with a wide range of clients, colleagues, organizations and communities despite potential differences
 - a. Interact with colleagues and supervisors in a professional and appropriate manner
 - b. Engage in self-care and appropriate coping skills in regard to stressors

CADT/PHP track – West Allis Location

Goal 10: To produce graduates who are able to function confidently as an Attending Psychologist within an Intensive Outpatient or Partial Hospitalization Program

Objective(s) for Goal 10: Demonstrate the ability to provide high quality individual, group and family therapy to child and adolescent patients who present with a variety of diagnoses. Provide high quality consultation and supervision to team members, effectively apply milieu management and problem solving strategies, monitor and guide treatment progress, and provide accurate and thorough diagnostic evaluations for the CADT/PHP patients.

Competencies:

1. Provide evidenced-based individual, group, and family therapy consistent with the role of a Health Service Psychologist.
2. Provide individual and group supervision that is consistent with currently accepted competency based models to pre-masters students working on CADT/PHP.
3. Provide consultation to MHPs, MHTs, and social service personnel to appropriately apply evidence-based treatment strategies consistent with patient needs.
4. Apply the principles of Irwin Yalom to group based treatment for high quality patient care and milieu management.
5. Apply principles of DBT as appropriate to an internalizing patient population.
6. Complete high quality diagnostic evaluations in an accurate and timely manner that delineate patient needs and goals using DSM-5 nosology.
7. Monitor pt's treatment progress and offer guidance to team members regarding pt clinical needs

OR

Anx/OCD Track – Oconomowoc Location

Goal 10: To produce graduates who are able to function confidently as Psychologist within an evidence-based residential program

Objective(s) for Goal 10: Demonstrate the ability to deliver high quality evidence-based treatment to patients who present with an anxiety disorder and/or obsessive-compulsive related disorder in

individual and group format. Provide high quality consultation and supervision to team members, effectively apply milieu management and problem solving strategies, monitor and guide treatment progress, and participate on and support a multidisciplinary team.

Competencies:

1. Provide evidenced-based individual, group, and family therapy (if applicable) consistent with the role of a Psychologist.
2. Provide individual and group (if applicable) supervision that is consistent with currently accepted competency based models to pre- and post-masters students working at the OCD Center.
3. Provide consultation to behavioral specialists and social service personnel to appropriately apply evidence-based treatment strategies consistent with patient needs and high quality patient care.
4. Apply principles of ERP independently to complex cases
5. Monitor patients' treatment progress with validated measures and offer guidance to treatment team members regarding patients' clinical needs.
6. Apply ancillary CBT-based treatment methods independently as needed (HRT, DBT, BA, etc.)
7. Participate on and communicate effectively with members of a multidisciplinary team to achieve and maintain high quality patient care.
8. Demonstrate high level knowledge of CBT and conceptualization of complex cases using a CBT framework

Internship Format:

Interns will work 12 consecutive months, 40 hours a week, Monday through Friday. Their 2,080 hours will be spent in direct service, indirect service, didactic training and supervision. Two weeks of paid time-off and holiday pay for RMH approved holidays will also be offered. Professional development time will be offered for activities such as post-doctoral interviews, dissertation defense, professional development conferences and job interviews. Interns will receive release time to complete additional educational activities as necessary. Interns will be evaluated on an ongoing basis throughout the internship year, with formal evaluations taking place quarterly.

Individual supervision occurs formally for a minimum of 2 hours per week. Group supervision takes place at a minimum of two hours weekly and offers an interdisciplinary team format for training. Informal supervision will be frequent as interns will be in close proximity to their supervisors daily. Interns indicate their training status when meeting with clients and families. Supervisors are actively involved with each case and accept ultimate clinical responsibility for case direction and management.

All states regulate the practice of psychology and have different requirements for licensure. It will be important for the intern to thoroughly understand the expectations of the state in which they intend to practice. In Wisconsin, a year of post-doctoral supervision is a requirement of licensure.

After being matched to the doctoral internship, the intern must successfully complete the Rogers Memorial Hospital application process, which includes completing a written application, passing a criminal background check, TB test, physical examination and a drug screen.

Interns will be offered a pay of \$22,500.00 over the course of the year, paid out hourly. They will receive a hospital orientation and training as a member of the staff. In addition, they will be offered enrollment within the hospital's health insurance and/or dental insurance programs and are covered by the organization's liability insurance during their temporary twelve (12) months of employment (see applicable Summary Plan Descriptions for further details regarding service, cost and plan administration).

Since interns are employed by the hospital for their temporary twelve (12) months of employment, they are covered and must comply with all policies of the hospital, including but not limited to grievances, anti-harassment, and performance expectations. Interns can access these policies during the hospital's orientation process and in full through the Rogers

Memorial Hospital website. Interns can also refer to the Rogers Memorial Hospital Corporate Compliance Handbook available to all employees through the Human Resources Department.

Weekly Intern Activities:

Internship Activity	Hours
Direct Clinical Services	
Individual Therapy	4
Group Therapy	2
Family Therapy	3-4
Diagnostic Interviews	3-4
Psychological Testing	2-3
Subtotal Direct Services	14-17
Supervision	
Individual Supervision	2
Supervision of Supervision	2
Intern provided Supervision	2.5
Subtotal Supervision	6.5

Internship Activity	Hours
Training	
Interdisciplinary Treatment Team Meetings.	2
Didactic Seminars	2
Subtotal Training	4
Indirect Services	
Documentation	8-10
Report Writing	4
Research/Professional Development	4
Program Development/ Milieu Management/ Other Admin. work	1
Subtotal Indirect Services	17-19
Total Hours/Week	41-47

Didactic Seminars:

Interns meet weekly for two hours of didactic seminars as part of their activities. Following is the list of scheduled seminars:

- Clinical Documentation
- Post-Doctoral Opportunities
- Effectively Engage in Self-Evaluation
- Mandated Reporting to Child Protective Services (CPS)
- Keys to Developing and Conducting Professional Presentations
- Suicide and Self-Harming Behaviors
- Working With Adolescents
- Engaging Challenging Families and Obtaining Aftercare Options
- Functional Analytic Psychotherapy
- The EPPP and Licensure
- Testifying in Court
- Ethical Issues in Psychology
- Diagnostic Evaluations and Differential Diagnoses with Children and Adolescents
- Psychological Testing and Integrated Report Writing
- The Role of the Psychologist in the Hospital Setting
- Assessment and Treatment of Eating Disorders
- Assessment and Treatment of Depressive Disorders
- Assessment and Treatment of PTSD
- Adolescent DBT
- Supervision of Supervision
- Assessment and Treatment of Generalized Anxiety Disorder
- Assessment and Treatment of Social Anxiety Disorder
- Licensure Complaints
- Self-Care and its Role in a Psychologist's Ethical and Competent Practice and Secondary Traumatic Stress
- Micro-aggressions in Real-Time
- AODA and Adolescent Mental Health
- Understanding and explore the impact of one's own cultural background
- Program Development
- Critical Review of Research Manuscripts
- Understanding and Exploring Gender
- Avoidant/Restrictive Food Intake Disorders
- Assessment and Treatment of Panic Disorder
- Management of a Trauma Informed Milieu
- Assessment and Treatment of Obsessive-Compulsive Spectrum Disorder
- Psychological Consultation
- Child and Adolescent Depressive Disorders

Accreditation:

The internship is a member in good standing of the Association of Psychology Post-doctoral and Internship Centers (APPIC). The internship is accredited by the American Psychological Association (APA) as of 2014 with the next site visit scheduled for 2021.

Supervising Psychologists:

Nancy Goranson, Psy.D., Director of Clinical Training and Supervising Psychologist, Partial Hospitalization Program and CADT- Milwaukee

Kristin Miles, Psy.D., Co-Director and Supervising Psychologist, CADT – Milwaukee

Bradley Riemann, Ph.D., Chief Psychologist, Clinical Director, Obsessive-Compulsive Disorder Center and Cognitive-Behavioral Therapy Services

David Jacobi, Ph.D., Supervising Psychologist, Obsessive-Compulsive Disorder Center and Cognitive-Behavioral Therapy Services

Other Contributing Psychologists:

Brenda Bailey, Ph.D.

Jennifer Carrasco, Ph.D.

Colleen Drosdeck, Psy.D

Nicholas Farrell, Ph.D.

Martin Franklin, Ph.D.

Amy Kuechler, Psy.D.

Heather Jones, Ph.D.

Amanda Heins, Ph.D.

Kristine Kim, Psy.D.

Jamie Roberts, Psy.D.

Angela Stebbins, Psy.D.

Chad Wetterneck, Ph.D.

Additional Treatment Providers: Psychology interns routinely interact with the following team members:

- Child and adolescent psychiatrists who manage and monitor the patient's medications and consult with members of the treatment team regularly to address diagnostic and clinical issues.
- Social workers who provide the majority of the individual, family, and group therapy throughout a patient's stay. Working with the social worker and the entire treatment team, psychology interns will formulate treatment goals for their patients and assess progress towards these goals. They will manage the individual and family therapy for children on the social worker's and counselor's clinical caseload.
- Registered nurses who assist the patient with routine medical needs and dispense medications within the treatment setting.
- The school liaison who takes responsibility for communicating with a child's school and shares needed information to prepare a successful return to school after discharge.
- The experiential therapist who addresses a child's treatment needs through the use of group therapy, recreation, art, movement, and socialization.
- The mental health professional who provides psycho-educational groups to improve the patient's self-esteem and increase their repertoire of coping skills.
- The mental health technician who helps children de-escalate and process feelings and behaviors when they become emotionally overwhelmed or disruptive in the group setting.
- Behavioral Specialists who develop a treatment hierarchy and then work individually with each patient to complete his or her daily exercises and assignments.
- Registered Dieticians who provide nutritional education and counseling.
- Post-doctoral staff who assist the psychologists and treatment teams with their needs.
- Patient Safety Associates who serves as a support and coach for the treatment team and will respond to patient crisis situations, model de-escalation techniques and train safe patient intervention techniques.
- The Care Transition Specialist who coordinates discharge resources per patient, arranges appointments and assists in facilitating treatment through communications to other disciplines.

Clerical support is provided in each department by the unit secretary, as well as by the secretary for the Center for Research and Training and via the Medical Records Department. RMH has an electronic medical record and technical assistance is provided at all times via the IT department staff.

Outside Employment:

Interns are asked not to participate in employment outside of their internship without prior permission.

Internship Admissions, Support and Initial Placement Data:

Diversity Statement:

Our training program resides within Rogers Memorial Hospital, which is an Equal Opportunity Employer. We are committed to creating a learning environment that welcomes diversity and select candidates representing a variety of programs and theoretical orientations, geographic areas, ages, racial and ethnic backgrounds, sexual orientations, disabilities, and life experiences. All things being equal, consideration is given to applicants who identify themselves as members of historically underrepresented groups on the basis of racial or ethnic status; as representing diversity on the basis of sexual orientation; or as representing diversity on the basis of disability status. These factors may be indicated on their application.

INTERNSHIP PROGRAM TABLES

Date Program Tables are updated: July 5th, 2018

Internship Program Admissions

Applicants must be a student in an APA-accredited clinical or counseling psychology program. Occasionally the program may consider applicants from programs with pending applications for accreditation. At least three years of graduate education have been completed by the applicant, and a master's degree in psychology or a closely allied field conferred by the start date of the internship. Completion of 1,000 of clinical practice, including at least 400 hours of direct patient care, is required. A picture for identification purposes may be brought to the interview or taken at the interview.

Endorsement from the applicant's director of graduate training or department chair that s/he is prepared for internship, on the standard forms designated as part of the universal application.

Total Direct Contact Intervention Hours	Y	Amount: 400
AND/OR		
Total Direct Contact Assessment Hours	Y	Amount: 400

Other required minimum criteria used to screen applicants:

Eligibility of Applicants:

1. Currently enrolled in an APA-accredited Ph.D. or Psy.D. program in clinical or counseling psychology (occasionally the program may consider applicants from programs with pending applications for accreditation);
2. Have completed adequate and appropriate supervised clinical practicum training which must include at least 400 assessment and/or intervention hours and a minimum of 1000 total clinical hours (as indicated on the AAPI);
3. Must be in good academic standing in their academic departments;
4. Must have the AAPI readiness form completed by their academic program's director of training with no indications of concern about professionalism or ethical behavior;
5. Have interests, aptitudes, and prior academic and practicum experiences that are appropriate for the internship's goals and objectives;
6. Must have successfully completed all necessary coursework. Completion of dissertation proposal preferred by December 15 in the year prior to internship.

Students from doctoral programs who have met all the requirements of their program and are able to apply for internship must submit the following materials:

1. Cover letter clearly indicating their professional goals and interests and the internship track for which you are applying
2. Curriculum vitae
3. Three letters of recommendation
4. Writing sample (psychological report or treatment summary)
5. Completed AAPI (APPIC Application for Psychology Internship)
6. All graduate school transcripts

This information should be submitted through the AAPI online portal.

Financial and Other Benefit Support for Upcoming Training Year*

Annual Stipend/Salary for Full-time Interns: \$22,500

Annual Stipend/Salary for Half-time Interns: NA

Program provides access to medical insurance for intern?	Yes
Trainee contribution to cost required?	Yes
Coverage of family member(s) available?	Yes
Coverage of legally married partner available?	Yes
Coverage of domestic partner available?	Yes
Hours of Annual Paid Personal Time Off (PTO and/or Vacation):	80 hours (10 days)
Hours of Annual Paid Sick Leave: This is encompassed in the PTO	
In the event of medical conditions and/or family needs that require extended leave, does the program allow reasonable unpaid leave to interns/residents in excess of personal time off and sick leave?	Yes

Other Benefits:

Eligibility by FTE	Benefit
.75 - 1.0	Health Insurance
.75 - 1.0	Dental Insurance
.75 - 1.0	Vision Insurance
.75 - 1.0	Flexible Spending Accounts
.5 - 1.0	Life, Long & Short Term Disability
.5 - 1.0	Voluntary Life and AD&D Insurance
.5 - 1.0	Paid Time Off Plan
.5 - 1.0	Continuing Education Reimbursement
All	Tuition Reimbursement
All	Retirement - 401(k) Plan
All	Employee Assistance Program
All	Wellness Program

*Note. Programs are not required by the Commission on Accreditation to provide all benefits listed in this table.

Initial Post-Internship Positions
(Aggregated Tally for the Preceding 3 Cohorts)

	2015-2018	
Total # of interns who were in the 3 cohorts:	17	
Total # of interns who did not seek employment because they returned to their doctoral program/are completing doctoral degree:	1	
	PD	EP
Community mental health center	0	0
Federally qualified health center	0	0
Independent primary care facility/clinic	0	0
University counseling center	0	0
Veterans Affairs medical center	0	0
Military health center	0	0
Academic health center	0	0
Other medical center or hospital	1	0
Psychiatric hospital	4	3
Academic university/department	0	0
